Brief project description:

I have the greatest idea! My department has never done a holiday card, but we should, and I thought if we're going to do a card, we need to make it the best holiday card done by any department at Auburn ever!!! Here's my idea: You know those 3D pop-up cards? Well, I want our card to have Funchess Hall pop up when you open the card. But that's not all. Here's the best part: There would be a small air-pump device embedded in the card so that when the card is opened and Funchess Hall pops up, a poof of air would be released, inflating a clear cellophane bubble around Funchess while circulating artificial snow. It would be a snow globe in a card!! Isn't that great? What do you think? I've never seen one of these; I'm sure it's never been done before. But you guys are so amazing, I'm sure you can make it happen! I'm so excited to work with you guys on this! I look forward to meeting about it and getting started on it soon!

Do you have an in-hand date you need these materials by?
