Alabama Natural Heritage Program®

Keeping Track of Alabama's Natural Heritage

The purpose of the Alabama Natural Heritage Program® (ALNHP) is to provide the best available scientific information on the biological diversity of Alabama to guide conservation action and promote sound stewardship practices. Established by The Nature Conservancy in 1989, it is one of a network of such programs collectively known as the Natural Heritage Network, which is represented by its membership organization NatureServe. NatureServe works to aggregate data from individual Network Programs and is dedicated to the furtherance of the Network and the application of Heritage data to biodiversity conservation.. The mission of Natural Heritage Programs is to collect and manage data about the status and distribution of species and ecosystems of conservation concern. Natural heritage programs have become the recognized source for the most complete and detailed information on rare and endangered species and threatened ecosystems, relied upon by government agencies, corporations, and the conservation community alike. Today the NatureServe network includes 74 independent natural heritage programs and conservation data centers throughout the United States, Canada, Latin America, and the Caribbean. Most heritage programs (or conservation data centers) are housed within state or provincial government agencies, while some reside within universities or non-governmental organizations. ALNHP is administered through the Auburn University Museum of Natural History, Department of Biological Sicences. ALNHP provides the following services: biodiversity data management, inventory, biological surveys, biological monitoring, site prioritization, conservation planning, Geographic Information System services, spatial modeling, and land management expertise.

Natural Heritage Programs have three broad functions: to collect information on the status and distribution of species and natural communities, to manage this information in a standardized way, and to disseminate this information to a wide array of users. Natural Heritage Programs use a standardized information management system to track biodiversity data including taxonomy, distribution, population trends, habitat requirements, relative abundance, quality, condition, and viability. Programs also track non-biological information including land ownership type, land-use and management, distribution of protected areas, and threats to species or their habitat.

One of the important tasks each heritage program performs is the regular compilation of a "Rare Species Inventory List" for the state that ranks by priority each element based on the number and quality of occurrences. In general, species are listed in alphabetical order (by Order, Family, Genus) within the taxonomic groups. The only exception is birds where the order in which the species are presented follows the American Ornithologists' Union's checklist of North American birds. Although the inventory list is compiled using the best scientific information available at the time, there is always more current information available on a particular species, distribution and/or status. We would appreciate any new information on the location, abundance, or rarity of any of the species on the following list. Please send your comments to the appropriate staff member.

Scientific classification, common names, and order in which species are presented follow AOU (1998) and Chesser et al. (2015) for birds, Best and Dusi (2014) for mammals, Boschung and Mayden (2004) and Mettee et al (1996) for fish, and Williams et al. (2008) for mussels. Scientific and common names for reptiles and amphibians follow that of Crother (2012), but the order in which species are presented follow that used by Mirachi (2004). Other taxon are presented alphabetically.

Staff Directory, Resources, & Partners

Auburn University Museum of Natural History

The mission of the Auburn University Museum of Natural History is to conduct biodiversity research, preserve and document our region and planet's biodiversity, and to lead and promote activities related to natural history education and outreach for Auburn University and all citizens of the state of Alabama. Our vision is to emerge as the primary repository for all natural history collections currently maintained at Auburn University and to function as a center of excellence for biodiversity research, education, and outreach. We will capitalize on strengths of the biodiversity heritage collections in our care and the vast organismal knowledgebase of the curators and staff to establish a gateway through which all segments of society can come discover the natural sciences and appreciate the relevance of biodiversity to human health and quality of life. We will preserve and document the rich natural heritage of Alabama while concurrently creating opportunities for students and teachers from regional schools, the general public, students at Auburn University, and researchers to explore our planet's biodiversity. We seek to inspire an appreciation of nature and the environment so that we might better conserve it for future generations.

NatureServe

NatureServe is a non-profit conservation organization whose mission is to provide the scientific basis for effective conservation action. NatureServe represents an international network of biological inventories—known as natural heritage programs or conservation data centers—operating in all 50 U.S. states, Canada, Latin America and the Caribbean. NatureServe's three organizational goals are:

- (1) Help make biodiversity a mainstream consideration in all significant conservation and natural resource management decisions by making it simple for conservationists, government agencies, corporations, and landowners to access and use high-quality biodiversity information.
- (2) Advance our scientific resources and information technology systems in order to meet the needs of our clients and partners.
- (3) Strengthen our organizational effectiveness and capacity and better leverage the power of the NatureServe network to inform conservation action at local, regional, national, and international scales.

Definition of Heritage Ranks

The Alabama Natural Heritage Program uses the Heritage ranking system developed by NatureServe. Each species is assigned two ranks; one representing its range-wide or global status (G rank), and one representing its status in Alabama (S rank). Species with a rank of 1 are most critically imperiled; those with a rank of 5 are most secure. Rank numbers may be combined when there is uncertainty over the status, but ranges cannot skip more than one rank (e.g., an element may be given a G-rank of G2G3, indicating global status is somewhere between imperiled and vulnerable).

Global Ranking System

- G1 Critically Imperiled At very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.
- G2 Imperiled At high risk of extinction due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.
- G3 Vulnerable At moderate risk of extinction due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.
- G4 Apparently Secure Uncommon but not rare; some cause for long-term concern due to declines or other factors.
- G5 Secure Common; widespread and abundant.
- GX Presumed Extinct (species) Not located despite intensive searches and virtually no likelihood of rediscovery.
 Eliminated (ecological communities) Eliminated throughout its range, with no restoration potential due to extinction of dominant or characteristic species.
- GH Possibly Extinct (species)/ Eliminated (ecological communities and systems) Known from only historical occurrences but still some hope of rediscovery There is evidence that the species may be extinct or the ecosystem may be eliminated throughout its range, but not enough to state this with certainty.
- GU Unrankable Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.
- GNR Not ranked to date.
- G#T# Infraspecific Taxon (trinomial) The status of infraspecific taxa (subspecies or varieties) are indicated by a "T-rank" following the species' global rank. Rules for assigning T-ranks follow the same principles outlined above for global conservation status ranks. A T-rank cannot imply the subspecies or variety is more abundant than the species as a whole-for example, a G1T2 cannot occur. At this time, the T rank is not used for ecological communities.

State Ranking System

- S1 Critically Imperiled Critically imperiled in Alabama because of extreme rarity (5 or fewer occurrences of very few remaining individuals or acres) or because of some factor(s) making it especially vulnerable to extirpation from Alabama.
- S2 Imperiled At high risk of extirpation because of rarity very restricted range, very few populations, steep declines, or other factors making it very vulnerable to extirpation from Alabama.
- S3 Vulnerable Rare or uncommon in Alabama at moderate risk of extirpation due to a restricted range, relatively few populations, recent and widespread declines, or other factors.
- S4 Apparently Secure Apparently secure in Alabama, may be uncommon, but not rare. May have some cause for long-term concern due to declines or other factors.
- S5 Secure Demonstrably secure in Alabama; common, widespread, and abundant in the state
- SX Presumed Extirpated Species or community is believed to be extirpated from Alabama. Not located despite intensive searches of historical sites and other appropriate habitat, and virtually no likelihood that it will be rediscovered.
- SH Historical (Possibly Extirpated) Species or community occurred historically in Alabama, and there is some possibility that it may be rediscovered. Its presence may not have been verified in the past 20-40 years. A species or community could become SH without such a 20-40 year delay if the only known occurrences in Alabama were destroyed or if it had been extensively and unsuccessfully looked for. The SH rank is reserved for species or communities for which some effort has been made to relocate occurrences, rather than simply using this status for all elements not known from verified extant occurrences.
- SNR Unranked State conservation status not yet assessed.
- SNA A conservation status rank is not applicable because the species is not a suitable target for conservation activities in the state.¹
- SU Unrankable Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.

Variant Ranks and Rank Modifiers

G#G# Range Rank – A numeric range rank (e.g., G2G3) is used to indicate the range of uncertainty in the status of a species or community (e.g., an element may be given a G-rank of G2G3, indicating global status is somewhere between imperiled and vulnerable). Ranges cannot skip more than one rank (e.g., GU should be used rather than G1G4). Also applies to state ranks (e.g., S2S3)

HYB Hybrid

- Q Questionable taxonomy Taxonomic distinctiveness of this entity at the current level is questionable; resolution of this uncertainty may result in change from a species to a subspecies or hybrid, or the inclusion of this taxon in another taxon, with the resulting taxon having a lower-priority conservation priority.
- ? Inexact Numeric Rank Denotes inexact numeric rank (e.g., G2?)

Breeding Status Qualifiers²

- B Breeding Conservation status refers to the breeding population of the species in the state. Regularly occurring, usually migratory and may be present only during the breeding season.
- N Nonbreeding Conservation status refers to the nonbreeding population of the species in the state. Regularly occurring, usually migratory and may not breed in Alabama; this category includes migratory birds, bats, sea turtles, and cetaceans.
- M Migrant Migrant species occurring regularly on migration at particular staging areas or concentration spots where the species might warrant conservation attention. Conservation status refers to the aggregating transient population of the species in the nation or state/province.

For more information regarding Conservation Status Ranks, see http://www.natureserve.org/explorer/ranking.htm#globalstatus

¹ A conservation status rank may be not applicable for some species, including long distance aerial and aquatic migrants, hybrids without conservation value, and non-native species or ecosystems, for several reason

A breeding status is only used for species that have distinct breeding and/or non-breeding populations in the state. A breeding-status S-rank can be coupled with its complementary non-breeding-status S-rank if the species also winters in the state. In addition, a breeding-status S-rank can also be coupled with a migrant-status S-rank if, on migration, the species occurs regularly at particular staging areas or concentration spots where it might warrant conservation attention. Multiple conservation status ranks (typically two, or rarely three) are separated by commas (e.g., S2B,S3N or SHN,S4B,S1M).

Definitions of Federal & State Listed Species Status

Federal - U.S. Fish and Wildlife Service

The U.S. Endangered Species Act (U.S. ESA) is the primary legislation that affords federal legal protections to threatened and endangered species in the United States, and is administered by the U.S. Fish and Wildlife Service (USFWS) (http://endangered.fws.gov/) and U.S. National Marine Fisheries Service (NMFS) (http://endangered.fws.gov/) and U.S. National Marine Fisheries Service (NMFS) (http://endangered.fws.gov/) and U.S. National Marine Fisheries Service (NMFS) (http://www.nmfs.noaa.gov/prot_res/overview/es.html). As defined by the Act, endangered refers to species that are "in danger of extinction within the foreseeable future throughout all or a significant portion of its range," while threatened refers to "those animals and plants likely to become endangered within the foreseeable future throughout all or a significant portion of their ranges." Plant species and varieties (including fungi and lichens), animal species and subspecies, and vertebrate animal populations are eligible for listing under the Act. Status under the U.S. Endangered Species Act in data provided by ALNHP is based on formal notices published by USFWS or NMFS in the Federal Register. Where names used by the USFWS differ from those used by ALNHP, ALNHP records include notes indicating under what name the USFWS lists the species and how that relates to the name used by ALNHP.

ESA Status Definitions

- LE Listed Endangered: A species in danger of extinction throughout all or a significant portion of their range.
- LT Listed Threatened: A species likely to become endangered within the foreseeable future throughout all or a significant portion of their range.
- PE Proposed Endangered: A species proposed to be listed as endangered.
- PT Proposed Threatened: A species proposed to be listed as threatened.
- C Candidate: A species under consideration for official listing for which there is sufficient information to support listing. The USFWS encourages other agencies to give consideration to such taxa in environmental planning.
- XN Experimental Population, Nonessential: Experimental reintroduced population.
- SC Species of Concern: Species that have not been petitioned or been given Endangered, Threatened, or Candidate status, but have been identified as important to monitor. (An unofficial status with no regulatory rquirements)
- UR Under Review in the Candidate or Petition Process: A species under review in the candidate or petition process. A 90-day finding indicated that listing may be warranted, and a full status review has been initiated to determine if listing is warranted. (An unofficial status with no regulatory requirements)
- PET Petitioned for listing A species that has been petitioned to be listed as endangered or threatened under the Endangered Species Act. Petition findings by USFWS have not yet been made.
- SAT Similarity of Appearance: A species listed as threatened due to a similarity of appearance to a listed species. Species listed as SAT are not biologically endangered or threatened and are not subject to Section 7 consultation.

State - Alabama Department of Conservation and Natural Resources (ADCNR)

Wildlife & Freshwater Fisheries Division

Alabama does not have a state law equivalent to the federal endangered species act so species do not have regulatory protection as state endangered or threatened species. However, some species do receive regulatory protection through the *Alabama Regulations on Game Fish and Fur Bearing Animals* published annually. These are the primary regulations affording state protection for some species in Alabama, and are administered by the Alabama Department of Conservation and Natural Resources. Copies of these regulations may be obtained from the Division of Wildlife & Freshwater Fisheries, Alabama Department of Conservation & Natural Resources, 64 North Union Street, Montgomery, AL 36104. A digital version of these regulations is available online at http://www.outdooralabama.com/season-and-bag-limits.

State Status Code Definitions

SP – State Protected: Species protected by Regulation 220-2-.92 (Nongame Species Regulation), 220-2-.98 (Invertebrate Species Regulation), 220-2-.26(4) (Protection of Sturgeon), 220-2-.94 (Prohibition of Taking or Possessing Paddlefish), or 220-2-.97 (Alligator Protection Regulation).

PSM – Partial Status Mussels: All mussel species not listed as a protected species under the Invertebrate Species Regulation are partially protected by other regulations of the Alabama Game, Fish, and Fur Bearing Animals Regulations. Regulation 220-2-.104 prohibits the commercial harvest of all but the 11 mussel species for which commercial harvest is legal. Regulation 220-2-.52 prohibits the take, capture, kill, or attempt to take, capture, or kill of any freshwater mussel from Wheeler Lake from Guntersville Dam downstream to the mouth of Shoal Creek and from the upstream end or head of Hobbs Island downstream to Whitesburg Bridge, Pickwick Lake from Wilson Dam downstream to the upper end or head of Seven Mile Island, Wilson Lake from Wheeler Dam downstream to the mouth of Town Creek on the south bank and the mouth of Bluewater Creek on the north bank, and the Cahaba River.

RT – Regulated Turtle: Species for which the Turtle Catcher/Dealer/Farmer Regulation (Regulation 220-2-.142) imposes a limit on the number which can be possessed or size limits.

GA – Game Animal (Managed hunting regulations).

GANOS – Game Animal - No Open Season: Species designated a game animal by Regulation 220-2-.07, but for which there is no open season.

GB – Game Bird (Managed hunting regulations).

GBNOS – Game Bird - No Open Season: Species designated a game bird by Regulation 220-2-.04, but for which there is no open season.

GF – Game Fish (Managed fishing regulations).

GF-HP – Game Fish – Harvest Prohibited: Species designated a game fish by Regulation 220-2-.34, but harvest of the species in the state is prohibited.

CNGF – Commercial or Non-Game Fish (Managed fishing regulations).

State Wildlife Action Plan (SWAP) Status Definitions

In order to receive funds through the Wildlife Conservation and Restoration Program and the State Wildlife Grants Program, Congress charged each state and territory with developing a wildlife action plan. These proactive plans, known technically as "comprehensive wildlife conservation strategies," assess the health of each state's wildlife and habitats, identify the problems they face, and outline the actions that are needed to conserve them over the long term. The wildlife action plans identify a variety of actions aimed at preventing wildlife from declining to the point of becoming endangered, and outline the steps that are needed to conserve wildlife and habitat before they become rarer and more costly to protect. One component of the plan was identifying Species of Greatest Conservation Need (GCN). Species were assigned a status based on the expert opinion of taxa committees. The taxa evaluated for inclusion on the SGCN list were birds, mammals, amphibians, reptiles, fishes, mussels, aquatic snails, and crayfishes.

SWAP Status Code Definitions

- P1 Priority 1/Highest Conservation Concern: taxa critically imperiled and at risk of extinction/extirpation because of extreme rarity, restricted distribution, decreasing population trend/population viability problems, and specialized habitat needs/habitat vulnerability due to natural/human-caused factors. Immediate research and/or conservation action required.
- Priority 2/High Conservation Concern: taxa imperiled because of three of four of the following: rarity; very limited, disjunct, or peripheral distribution; decreasing population trend/population viability problems; specialized habitat needs/habitat vulnerability due to natural/human-caused factors. Timely research and/or conservation action needed.
- EX Extirpated: taxa that historically occurred in Alabama, but are now absent; may be rediscovered in the state, or be reintroduced from populations existing outside the state.
- EXCAU Extirpated/Conservation Action Underway: taxa that historically occurred in Alabama, were absent for a period of time, and currently are being reintroduced, or have a plan for being reintroduced, into the state from populations outside the state.
- Extinct: taxa that historically occurred in Alabama, but are no longer alive anywhere within their former distribution.

⁴ Historic occurrence.

¹⁰ No occurrence record in ALNHP database but the US Fish & Wildlife Service lists this species as occurring or believed to occur in the county (http://www.fws.gov/daphne/es/specieslst.html).

The species is known from adjacent areas of Tennessee and Georgia so it probably occurs in northeastern Alabama. Distribution maps often depict it occurring in Alabama, but no specimens are known from the state.

Both subspecies that occurred in the eastern United states (*Puma concolor cougari*, presumed extinct in wild, and *P. concolor coryi*) are listed as endangered.

¹³ Canis rufus, LE - listed endangered range wide, except where listed as experimental populations; presumed extinct in wild except experimental populations in North Carolina and Tennessee.

Ursus americanus is not included in the list of protected species in Nongame Species Regulation 220-2-.92, but is protected under Alabama Game, Fish and Wildlife Laws, Section 9-11-480-481 which makes it illegal to hunt, wound, injure, kill, trap, collect, or capture a black bear, or to attempt to engage in that conduct during the closed season for black bear. It is designated a game animal by Regulation 220-2-.06 of the Alabama Regulations on Game, Fish, and Fur Bearing Animals, but there is no open season for the species.

Black bear sightings have been reported from the county, but there likely is not an established, self-sustaining population in the county.

Fishes

CLASS ACTINOPTERYGII - Ray-finned Fishes

ORDER ACIPENSERIFORMES - Sturgeons and Paddlefishes

Family Acipenseridae - Sturgeons

Acipenser fulvescens lake sturgeon G3G4 S1 SP EXCAU

Counties of occurrence: Cherokee, Limestone⁴, Madison⁴, Morgan⁴, Shelby⁴, St. Clair⁴, Talladega⁴

Acipenser oxyrinchus desotoi Gulf sturgeon G3T2 S1 LT SP P2

Counties of occurrence: Baldwin, Bibb⁴, Chilton⁴, Choctaw, Clarke, Coffee, Covington, Dale, Escambia, Elmore⁴,

Geneva, Houston, Macon⁴, Marengo⁴, Mobile, Monroe, Sumter⁴, Washington, Wilcox

Scaphirhynchus platorynchus shovelnose sturgeon G4 SX SAT ²⁹ SP³⁰ EX

Counties of occurrence⁴: Colbert, Lauderdale, Lawrence, Limestone, Morgan

Scaphirhynchus suttkusi Alabama sturgeon G1 S1 LE SP P1

Counties of occurrence: Autatuga, Baldwin, Clarke, Dallas, Elmore⁴, Greene⁴, Monroe, Montgomery⁴, Perry⁴,

Sumter⁴, Wilcox

Family Polyodontidae - Paddlefishes

Polyodon spathula paddlefish G4 S3 CNGF, SP³¹

Counties of occurrence: Autauga, Baldwin, Choctaw, Clarke, Dallas, Elmore, Greene, Hale, Lauderdale, Limestone,

Lowndes, Macon, Marengo, Mobile, Monroe, Montgomery, Perry, Sumter, Tallapoosa,

Tuscaloosa, Walker, Washington, Wilcox

ORDER LEPISOSTEIFORMES - Gars

Family Lepisosteidae - Gars

Atractosteus spatula alligator gar G3G4 S2 CNGF

Counties of occurrence: Baldwin, Clarke, Escambia, Mobile, Monroe

Lepisosteus platostomus shortnose gar G5 SX CNGF EX

Counties of occurrence⁴: Jackson, Lauderdale, Lawrence, Limestone, Madison, Marshall, Morgan

ORDER HIODONTIFORMES - Mooneyes

Family Hiodontidae - Mooneves

Hiodon alosoides goldeye G5 SX EX

Counties of occurrence⁴: Lawrence, Limestone, Madison, Morgan

Hiodon tergisus mooneye G5 S3S4

Counties of occurrence: Baldwin, Bibb, Chilton, Choctaw, Clarke, Colbert, Coosa, Dallas, Elmore, Greene, Hale,

Lamar, Lauderdale, Lawrence, Limestone, Lowndes, Macon, Madison, Marengo, Marshall,

Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Shelby, Sumter, Talladega,

Tallapoosa, Washington, Wilcox

⁴ Historic occurrence.

²⁹ Scaphirhynchus platorynchus is treated as threatened due to its similarity of appearance to the endangered pallid sturgeon (Scaphirhynchus albus).

³⁰ Scaphirhynchus platorynchus is not included in Nongame Species Regulation (Regulation 220-2-.92) but all species of sturgeon are protected by Regulation 220-2-.26(4) Restrictions on Possession, Sale, Importation and/or Release of Certain Animals and Fish.

³¹ *Polyodon spathula* is not included in the list of protected species in the Nongame Species Regulation 220-2-.92, but is protected by Regulations 220-2-.94 Prohibition of Taking or Possessing Paddlefish (Spoonbill) and 220-2-.43 Unlawful to Willfully Waste Paddlefish.

ORDER CLUPEIFORMES - Anchovies and Herrings

Family Clupeidae - Herrings

Alosa alabamae Alabama shad G2G3 S2 SC³² SP P1

Counties of occurrence: Baldwin⁴, Bibb⁴, Choctaw, Clarke⁴, Covington, Dale, Dallas, Elmore⁴, Escambia, Geneva,

Greene, Hale, Houston, Marengo⁴, Mobile⁴, Monroe, Perry⁴, Shelby⁴, Sumter, Tuscaloosa,

Wilcox

ORDER CYPRINIFORMES - Carps, Minnows, and Suckers

Family Cyprinidae - Carps and Minnows

Campostoma pauciradii bluefin stoneroller G4 S3
Counties of occurrence: Barbour, Chambers, Houston, Lee, Randolph, Russell

Chrosomus erythrogaster southern redbelly dace G5 S3

Counties of occurrence: Colbert, Franklin, Lauderdale, Lawrence, Limestone, Morgan

Cyprinella caerulea blue shiner G2 S1 LT SP P1

Counties of occurrence: Bibb⁴, Calhoun, Cherokee, Coosa, Cleburne⁴, DeKalb, Etowah⁴, Jefferson⁴, Shelby⁴,

Talladega4

Cyprinella callitaenia bluestripe shiner G2G3 S1 P1

Counties of occurrence: Barbour, Chambers, Clay, Henry, Houston, Lee, Randolph, Russell

Cyprinella gibbsi Tallapoosa shiner G4 S3

Counties of occurrence: Chambers, Clay, Cleburne, Coosa, Elmore, Lee, Macon, Randolph, Tallapoosa

Erimonax Monachus spotfin chub G2 SX LT, XN³³ SP EXCAU

Counties of occurrence⁴: Colbert, Lauderdale

Erimystax dissimilis streamline chub G4 S1S2 P2

Counties of occurrence: Jackson, Marshall, Lauderdale

Erimystax insignis blotched chub G4 S2

Counties of occurrence: Jackson, Lauderdale, Madison, Marshall

Hemitremia flammea flame chub G3 S3

Counties of occurrence: Blount, Calhoun, Colbert, DeKalb, Lauderdale, Lawrence, Limestone, Madison, Morgan,

Talladega

Hybognathus hayi cypress minnow G5 S3

Counties of occurrence: Dallas, Perry

Hybognathus nuchalis Mississippi silvery minnow G5 S4

Counties of occurrence: Autauga, Baldwin, Bibb, Dallas, Elmore, Fayette, Franklin, Greene, Marion, Perry,

Pickens, Sumter, Tuscaloosa, Washington, Wilcox

Hybopsis amblops bigeye chub G5 S3

Counties of occurrence: Colbert, Franklin, Jackson, Lauderdale, Lawrence, Limestone, Madison, Marshall

Hybopsis lineapunctata lined chub G3G4 S3

Counties of occurrence: Calhoun, Chambers, Clay, Cleburne, Coosa, Elmore, Etowah, Lee, Macon, Randolph,

Talladega, Tallapoosa

⁴ Historic occurrence.

³² Listed as a species of concern by the National Marine Fisheries Service (Federal Register 69(73):19975-19979, available at http://www.nmfs.noaa.gov/pr/pdfs/fr/fr64-19975.pdf).

³³ LT – Listed Threatened range wide except where listed as Experimental Population, Non-essential; There are three locations where it is designated Experimental but only one (Shoal Creek) includes portions of Alabama. XN – Experimental Population, Nonessential: TN-AL - Nonessential experimental population that would extend from the mouth of Long Branch, Lawrence County, Tennessee (Shoal Creek mile (CM) 41.7 (66.7 kilometers (km)), downstream to the backwaters of the Wilson Reservoir at Goose Shoals, Lauderdale County, Alabama (approximately CM 14 (22 km)), and would include the lower 5 CM (8 km) of all tributaries that enter this reach.

⁴ Historic occurrence.

³⁸ Elliptio nigella was thought to be extinct until it was recently rediscovered in the Flint River in Georgia.

³⁹ *Epioblasma capsaeformis* was listed as endangered under the Endangered Species Act in 1997, including the Duck River population. The Duck River population was described as a new species, *E. ahlstedti*, by Jones and Neves in 2010.

⁴⁰ Listed Endangered range wide by USFWS except where listed as Experimental Populations, Nonessential; XN Experimental Population, Non-Essential: AL - free-flowing reach of the Tennessee River below the Wilson Dam, Colbert and Lauderdale counties, Alabama, but no reintroductions have been made yet.

⁴¹ Both subspecies of *Epioblasma florentina* that occurred in Alabama (*E. florentina florentina* and *E. florentina walkeri*) were listed endangered rangewide by the USFWS. In 2001, *E. florentina florentina* was included on a list of species approved for a Nonessential Experimental Population in Wilson Dam tailwaters of the Tennessee River, Colbert and Lauderdale counties, Alabama, but no reintroductions have been made yet.

⁴² Possibly extinct.

⁴⁰ Listed Endangered range wide by USFWS except where listed as Experimental Populations, Nonessential; XN Experimental Population, Non-Essential: AL - free-flowing reach of the Tennessee River below the Wilson Dam, Colbert and Lauderdale counties, Alabama, but no reintroductions have been made yet.

⁴¹ Possibly extinct.

⁴³ An effort to reestablish *Epioblasma penita* into the Coosa River in the tailwaters below Jordan Dam was initiated in 2005.

⁴⁴ Species in the genus *Hamiota* were previously considered to be in the genus *Lampsilis*. Species listed under the Endangered Species Act were listed under the genus *Lampsilis*. Roe and Hartfield (2005) placed these four species in the new genus *Hamiota*. The U.S. Fish and Wildlife Service still uses *Lampsilis* on their website except for *Hamiota australis*.

⁴ Historic occurrence.

⁷ Alabama endemic.

⁴⁶ The USFWS lists *Pleurobema furvum* as endangered under the Endangered Species Act and considers *P. rubellum* as extinct. ALNHP considers *P. furvum* a synonym of *P. rubellum* following the taxonomy used by James D. Williams, Arthur E. Bogan, and Jeffrey T. Garner in *Freshwater Mussels of Alabama & the Mobile Basin in Georgia, Mississippi, and Tennessee* (2008). Williams et al. (2008) state "A formal reconciliation of the list should replace *P. furvum* with *P. rubellum*."

Thelypteris burksiorum was listed (as *T. pilosa* var. alabamensis) as threatened under the federal Endangered Species Act in 1992. Watkins and Farrar (2002) elevated the Alabama variety of *T. pilosa* to specific status as *T. burksiorum*. The U.S. Fish and Willdife Service still uses *T. pilosa* var. alabamensis as the species name on their website.

Coreopsis grandiflora var. i		Ketona tickseed	.7	G57	S2 S2		
Coreopsis nudata Counties of occurrence:		Georgia ticksee va, Houston, Mob		G3	? S1		
Coreopsis pulchra Counties of occurrence:		Woodland ticks alb, Etowah, Jack		G2	S2		
Echinacea pallida Counties of occurrence:		pale-purple con- bers, Greene, Lee		G4	S2		
Echinacea simulata Counties of occurrence:		wavy-leaf purpl	e coneflow	er G3	S1		
Erigeron strigosus var. dolo Counties of occurrence:		Cahaba daisy fl	eabane ⁷	G5T	2? S2?	•	
Eurybia chapmanii Counties of occurrence:		Chapman aster on, Mobile		G2C	S3 SH		
Eurybia eryngiifolia Counties of occurrence:		coyote-thistle as neva	ster	G3C	§4 S1		
Eurybia spectabilis Counties of occurrence:		showy aster Kalb		G5	S2		
Eurybia surculosus Counties of occurrence:		creeping aster		G40	S5 S1		
Helenium brevifolium Counties of occurrence:		little leaf sneeze nbia, Geneva	eweed	G4	S1		
Helenium vernale Counties of occurrence:		spring sneezewe nbia, Geneva	eed	G4	? S2		
Helianthus eggertii Counties of occurrence:		Eggert's sunflocution, Calhoun, D		G3 klin, Madiso			
Helianthus glaucophyllus Counties of occurrence:		white-leaved su	nflower	G30	S4 SH		
Helianthus longifolius Counties of occurrence:		longleaf sunflov alb, Jackson	ver	G3	S1S	2	
Helianthus porteri Counties of occurrence:		confederate dais Randolph	sy	G4	S2		
Helianthus smithii Counties of occurrence:		Smith's sunflow alhoun, Cherokee		G20 ourne, Jackso		arion ⁴ , Ran	dolph ⁴ ,
Helianthus verticillatus Counties of occurrence:		whorled sunflow	ver	G1	S1	LE	E
Iva microcephala Counties of occurrence:		small-headed m our, Conecuh, Hou		G5	S1		
Jamesianthus alabamensis Counties of occurrence:		jamesianthus alhoun, Cleburne	, Colbert, Fi	G3 ranklin, Jeffe		les, Shelby	, Winston
