A variety of teaching techniques and strategies are employed in the instruction of this course. The principal methods to be utilized include, but may not be limited to lectures, video tapes, visual aids, peer teaching, laboratory experiences, guest lectures and group discussion.

This is a professional education course in adult education. All participants are considered adults and are expected to not only study but also practice andragogy - to take responsibility for their learning. Thus, the participant is expected to contribute to the class setting by participating, and to be collaborative and supportive of all members of the learning setting. Adult education is not a place for passive learning but a place to explore, take risks and grow.

Ignorance is not vested in the participants while knowledge is vested in the instructor. Both are learners and have contributions to make to each other. Both are responsible for their own learning.
