Create a positive and motivating learning environment. Children learn better when they are motivated. Expressions of enthusiasm are vital to an effective program. Reinforcement is also very important for these children. We will provide you with a number of motivational strategies to use during the instructional time. It is *very important* that you implement these strategies when asked.

Encourage problem-solving skills. Infants and children should be aware of how to achieve specific goals through movement exploration.

Maintain personal space. Many young children are very tactile. Please remind them to respect the personal space of others, including yours.
