

Frasier Fir Greenhouse Covering Study Linville River Nursery, NC

Tom Starkey
Southern Forest Nursery Cooperative
Jim Rideout
Linville River Nursery NCDNR

Covering Materials Tested

- Vermiculite - is a natural mineral (resembling mica) that expands with the application of heat.
- Perlite - derived from volcanic glass that is heated and “pops” like popcorn to form the final product.
- Styrogrit – a non-porous product manufactured by recycling used styroblocks.
- Sand - is a naturally occurring granular material composed of finely divided rock and mineral particles
