

Undergraduate Researcher in Forest Health - PAID

The Forest Health Dynamics Laboratory at Auburn University is seeking six undergraduate research interns to assist on several studies: (1) to study the environmental factors that drive the emergence and severity of infection from Lecanosticta acicola across the southeast and (2) to investigate strain aggressiveness and seedling tolerance. Be part of a large, interdisciplinary effort aimed at reducing the economic impact of this fungus in the southeast United States. Our laboratory is a diverse and respectful work environment.

Requirements

- Driver's license
- Honest, hard-working, excellent attention to detail & enjoy teamwork
- Interested in a science career

Duties

- Collecting field & lab data
- Weekday & Weekend travel for data collection within Alabama
