- EPA – requires potency and physical stability for pesticides for 2 years
- Most manufacturers do not list expiration dates on containers – write your purchase date
- Consider how product has been stored – extreme cold or heat, wet
- Look for damage to packaging
- What does actual product look like? weird color, clumps, settling, separating
- Use jar and screen tests – does it mix well? does it leave particles on a screen?
- Apply it in a TINY test area – any negative effects?
