

Approximate Herbicide Pricing¹

J. A. Ferrell and B. A. Sellers²

From time to time, Extension agents, growers, or the general public have a need for a source of herbicide prices for general planning purposes. This fact sheet is a compilation of herbicide prices from several major suppliers and is a reflection of average full retail prices for each herbicide. This fact sheet is in no way intended to recommend one supplier over another, nor is it to be used as a weather gauge for herbicide pricing. In most cases, prices will vary from this list and actual prices may be affected by volume of purchase, frequency of purchase, method of payment, or other prior credit arrangements. Prices listed are for

commercial growers and should not be interpreted for products packaged for homeowner, lawn, or garden use.

This information should be useful to county agents who are recommending chemicals and are asked for ball park figures for cost or, more importantly, to growers who are preparing crop enterprise budgets for the coming growing season.

Prices are presented (Table 1) as total cost per unit, (i.e., per ounce, pound, or gallon).

Table 1. Approximate herbicide costs per unit.

Herbicide Trade Name	Herbicide Common Name	Registrant	Approximate Cost/Unit (\$)
2,4-D Amine	2,4-D	Several	13/gal
2,4-D Ester	2,4-D	Several	19/gal
Atrazine 4L	atrazine	various	11/gal
Atrazine 5L	atrazine	various	16/gal
Accent	nicosulfuron	DuPont	33/oz
Adapt	nicosulfuron	Mana	15/oz
Aim 2EC	carfentrazone	FMC	190/qt
Arsenal AC	imazapyr	BASF	165/gal
Arsenal Powerline	imazapyr	BASF	80/gal
Asulox	asulam	various	40/gal
Bentazon	bentazon	various	90/gal
Bicep II Magnum	atrazine + S-metolachlor	Syngenta	40/gal
Butyrac 175	2,4-DB	Cedar Chem	20/gal
