# CORE CURRICULUM

The Core Curriculum serves as the foundation of an Auburn University degree. Transcending majors and fields, the Core Curriculum develops skills that help prepare students for a career after graduation by fostering knowledge, skills, and perspectives.

The Core Curriculum is an opportunity to diversify your academic experience and serves as an introduction to Auburn University's General Education Student Learning Outcomes, which are later reinforced through major courses, work experiences, and participation in activities and organizations on campus.

In order to become lifelong learners and use a student's education to solve practical problems, by the time of graduation, students will be able to effectively:

## Locate, evaluate, and use information

## Read and think critically

## Apply mathematical methods

## Write and revise for a variety of purposes

- Analyze contexts and audiences and then act on that analysis in comprehending and creating texts.
- Analyze, synthesize, interpret, and evaluate ideas, information, situations, and texts.
- Recognize and use multiple strategies, to conceptualize, develop, and finalize projects.
- Recognize formal rules and informal guidelines that define genres, and shape readers' and writers' perceptions of correctness or appropriateness.
- Compose text using a range of media.
