

# CURRICULUM

The [Core Curriculum](#) serves as the foundation of an Auburn University degree. Transcending majors and fields, the Core Curriculum develops skills that help prepare students for a career after graduation by fostering knowledge, skills, and perspectives.

The Core Curriculum is an opportunity to diversify your academic experience and serves as an introduction to Auburn University's General Education [Student Learning Outcomes](#), which are later reinforced through major courses, work experiences, and participation in activities and organizations on campus.

In order to become lifelong learners and use a student's education to solve practical problems, by the time of graduation, students will be able to effectively:

Locate, evaluate, and use information

Read and think critically

Apply mathematical methods

Write and revise for a variety of purposes

Create and deliver oral presentations

Analyze their own society and its relationship to the larger global context

- Have knowledge of historic economic, political, or social systems around the globe.
- Analyze the relationship of historical economic, political, or social systems to the creation of the current global structures.
- Describe how current economic, political, or social systems are interconnected.
