The Core Curriculum is an opportunity to diversify your academic experience and serves as an introduction to Auburn University's General Education Student Learning Outcomes, which are later reinforced through major courses, work experiences, and participation in activities and organizations on campus.

In order to become lifelong learners and use a student's education to solve practical problems, by the time of graduation, students will be able to effectively:

Locate, evaluate, and use information

Read and think critically

Apply mathematical methods

Write and revise for a variety of purposes

Create and deliver oral presentations

Analyze their own society and its relationship to the larger global context

Interact in intercultural situations

Apply scientific principles

Analyze and value creative artistic endeavors

- Define and apply methodologies to investigate the products of the creative process (Product).
- Define and apply methodologies to investigate the creative process through the study and/or participation in the production of art, design and other areas of creative practice (Process/Practice).
- Define and apply methodologies to investigate and interpret information related to the historical, cultural, and other contexts of creative works, and subsequent and ongoing impact.
