

FALL 2019

ENGL 1103 English Composition I

3-hour lecture course. Students receive an intensive study of and practice in effective expository and argumentative writing.

ENGL 1123 English Composition II

3-hour lecture course. Students receive instruction in rhetorical principles, textual practices, cultural expectations, and critical habits of mind commonly associated with academic research writing.

HIST 1013 World History I

3-hour lecture course. Survey course on world history from early humanity to the late 18th century. Students will examine the record of human political, social, cultural, religious, and economic activities across time, regions, civilizations, and cultures.

MATH 1153 Pre-Calculus Algebra and Trigonometry

4-hour lecture course. Students are instructed on algebraic functions, Exponential Logarithmic functions, and analytic and geometric properties of trigonometric functions.

MATH 1613 Calculus I

4-hour lecture course. Students learn limits; the derivative of algebraic, trigonometric, exponential, and logarithmic functions; applications of the derivative and antiderivatives; the definite integral and applications to area problems; and the fundamental theorem of calculus.

SPRING 2020

ENGL 2203 World Literature before 1600 (Lit 1)

3-hour lecture course. Students complete culturally diverse readings in world literature from the ancient period to c. 1600 and engage in course discussions and assignments.

ENGL 2213 World Literature after 1600 (Lit 2)

3-hour lecture course. Students complete culturally diverse readings in world literature from c. 1600 to the present and engage in course discussions and assignments.

HIST 1023 World History II

3-hour lecture course. Survey course on world history from since the Industrial Revolution. Students will examine the record of human political, social, cultural, religious, and economic activities across time, regions, civilizations, and cultures.

MATH 1683 Calculus with Business Applications I

4-hour lecture course. Calculus with Business Applications I is designed for students desiring to major in College of Business and counts as Mathematics Core. Students learn differentiation and integration of exponential logarithmic algebraic functions and applications to business. Specific topics include functions of several variables, partial derivatives, multiple integrals.

THEA 2013 Introduction to Theatre

3-hour lecture course. Students are introduced to the appreciation of theatre arts including stage, television, and film and develop sensitive and critical sophistication as articulate, discriminating theatre-goers. Coursework includes play and film viewing, play-reading, critiques, and term projects.

MUSI 2733 Appreciation of Music

3-hour lecture course. Students acquire an orientation in the art of listening and learn about outstanding composers and musical composition. No previous music training is required.

PSYC 2013 Introduction to Psychology

3-hour lecture course. Students are introduced to the various subfields of psychology such as developmental, biological, cognitive, clinical, and social psychology.

SOCY 1003 Sociology: Global Perspective

3-hour lecture course. Students are introduced to the study of society and current social concepts and issues such as race and ethnicity, stratification, conformity and deviance, religion, sexuality and population are also examined.
