

## **Facilities Management announces temporary fueling procedures ahead of parking lot construction**

A portion of the Facilities Management parking lot will be closed December 7, 2015 through the end of February 2016 to replace underground fuel storage tanks. Beginning the second week in December, Facilities will implement temporary fueling vehicle procedures and a revised Tiger Transit route. Each change will allow Facilities to continue providing customer service with minimal impact to its clients and visitors.

Temporary Procedures Include:

### **Fuel Pump Location and Fueling Hours:**

- The fuel (gasoline and diesel) pumps will be temporarily located in the Facilities Management complex between Building 3 and Building 4.
- From December 7, 2015 -December 11, 2015, the temporary pumps will be manual, with an attendant on duty Monday thru Friday, 7:30 a.m. – 4:00 p.m., to assist customers. *Fueling cannot take place if the attendant is not on duty. The pumps will be manual during this time while the banner ID swipe card system is being relocated to the temporary fuel pump location.*
- From December 12, 2015 -February 2016, gasoline fuel will be available all hours via the AU banner ID card swipe system. Diesel fuel will remain manually operated with an attendant during the hours listed above.
- Holiday diesel fuel schedule: An attendant will be on duty during the holiday break Dec. 21-23 and 28-30 from 10:00 a.m. to 2:00 p.m.

### **Revised Tiger Transit Route:**

Tiger Transit buses will run a revised route by entering the complex from Lem Morrison Drive. Buses will continue to pick up passengers in front of the 3D Arts Building and exit the complex via Samford Avenue.

### **Parking Options:**

Additional parking spaces will be marked between Facilities Buildings 4 and 5 to replace spaces located inside construction fencing. Overflow parking will also be available between Facilities Building 6 and the 3D Arts Building.
