

Barbara Kemppainen has been a faculty member at AU's School of Pharmacy (4 years) and College of Veterinary Medicine (22 years). She obtained her PhD from the University of Georgia in the areas of pharmacology and toxicology. Her research has focused on skin absorption and metabolism of chemicals, and use of medicinal plants to prevent and treat disease in poultry. She teaches veterinary toxicology, wildlife toxicology, and is developing courses in alternative medicine and service learning. She has been Anatomy, Physiology, and Pharmacology's University Senator since 2005.
