

**Resolution concerning a moratorium on the “Policy for Inclusion of Tuition in Externally Funded Contracts and Grants”**

Whereas: Many faculty members feel that the recently established policy to require graduate student tuition be included in the budgets of all new proposed research budgets would damage the research enterprise and impedes Auburn University’s ability to increase graduate student enrollment (Goal 21 of the Strategic Plan),

And

Whereas: Without regard for Auburn University’s efforts to promote shared governance, this policy was implemented without sufficient input from appropriate faculty bodies including the Research Committee and University Senate.

Therefore be it resolved: that a moratorium be placed on the policy (the “Policy for Inclusion of Tuition in Externally Funded Contracts and Grants”) until such time that appropriate faculty bodies be consulted for their input, the likely impact of such a policy (both positive and negative) on Auburn University’s missions of research and graduate education be determined, and a report of these deliberations be provided to the University Senate.
