AUBURN'S APPLICATION SEASON IN FULL SWING

The application season for Fall 2025 is in full swing, and we are thrilled to share the results of the first early action round of decision releases. This year, we have seen a +2.4% increase in admits compared to last year, reflecting a competitive applicant pool. Notably, the average ACT scores and GPAs of this year's admits have risen, showcasing the academic strength of the incoming class. The competitiveness of this year's first round of applicants is among the highest in Auburn's history, setting a strong foundation for the remainder of the admissions cycle. The next round of decisions is set for release in mid-November, and we are excited to continue building an exceptional class.
