

Leach Science Center Policy on Electric Scooters and other Personal Electronic Mobility Devises (PEMDs)

Auburn University issued guidelines concerning PEMDs on August 16, 2022. Any individual that does not have assigned office space within Leach Science Center must adhere to the PEMDs Policy as follows:

1. Since bike racks are located outside of Leach Science Center, any PEMD, human-powered scooter, or bike that has wheels greater than four inches (4") in diameter shall not be brought into the building. The four-inch wheel specification is intended to allow for skateboards and compact scooters.
2. Charging of any PEMD within a lab room, classroom, or common area is prohibited.
3. Riding any PEMD or other item such as a human-powered skateboard inside the building is prohibited.
