

***TIGER TIPS***  
***RESOURCES FOR AUBURN RESEARCHERS***  
**Research.gov**

[Research.gov](#) is the National Science Foundation's (NSF) grants management system that provides easy access to research-related information and grants management services in one location. Research.gov is the modernization of FastLane, providing the next generation of grants management capabilities for the research community.

In **March 2013**, NSF will completely transfer all project reporting from FastLane to Research.gov. This means that Principal Investigators (PIs) and Co-PIs will use Research.gov to meet all NSF project reporting requirements, including submission of Final, Annual and Interim Project Reports and the Project Outcomes Report. The new Project Reporting Dashboard will make it easier for PIs, Co-PIs, and the Office of Sponsored Programs (OSP) staff to see which reports are due or overdue, and will provide access to all reports submitted to NSF.

The following links provide guidance regarding the capabilities of Research.gov; information related to the Project Outcome Reports (as required for new awards and existing awards that received funding amendments on or after January 4, 2010); and the upcoming requirements and instructions for preparation and submission of reports through Research.gov.
