General Guidelines

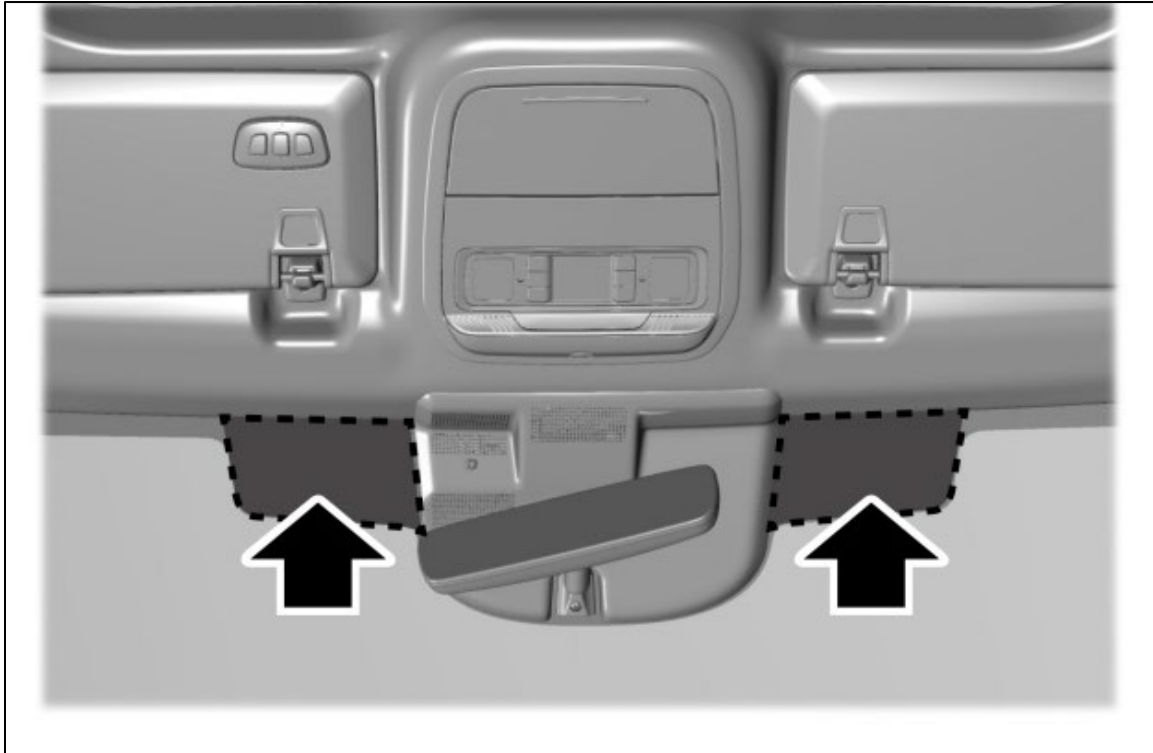

1. Place the tag horizontally in the clear portion of the windshield.
2. Thoroughly clean and dry the surface of the windshield where the Tag will be placed.
3. After peeling the backing of the tag, avoid touching the adhesive and keep the sticker as flat as possible to avoid breaking the antenna.
4. The tag should not touch any metal or metallic items like rearview mirrors, phone mounts, Decals, tint, camera, sensors,
5. The tag cannot be placed on any other part of the vehicle other than the front windshield. For example, the tag cannot be placed on the hood, roof, sun visors, wipers, windows, bumper, or rear windshield of the vehicle.
6. The tag should NOT be placed directly on metallic tinted glass, metallic sun strip, decals, foils, holograms, metallic inks, or near any of the in the vehicle.
7. Place the tag in the interior of the vehicle.
8. The tag should not be folded.
9. Ensure there is only one tag per vehicle. Remove any old toll tags.
10. The tag should be transferred to another windshield or vehicle.
