

RAYONIER SOUTHERN NURSERY MANAGER

Overview

At Rayonier, we're creating "value from the ground up" every day, starting with our people. People are the foundation for success and the key to making us the best performing company in the forest products industry. We are proud of our long history of success, our diverse mix of businesses and our values-based work environment, and invite you to consider a career with Rayonier.

Description

The Nursery Manager will be responsible for managing the day-to-day activities at Rayonier's Glennville Regeneration Center in Glennville, GA. This bare root southern pine nursery has a production capacity of approximately 25 million seedlings. The Nursery Manager's responsibilities will expand over time as Rayonier grows its timberlands through strategic acquisitions.

Duties & Responsibilities

- Sowing of the nursery, crop production, lifting of seedlings, and day-to-day activities at the GRC.
- Contracting and managing logistics of growing additional seedlings with outside vendor nurseries as needed.
- Develop and manage annual nursery budget.
- Coordinate and maintain computerized records and activities.
- Work with research personnel to install, measure, and maintain nursery studies as required.
- Work with the Genetics Resource Manager to make seeding deployment decisions involving genetic/site interactions.
- Coordinate seedling distribution and allocation from the nursery to forest locations.
- Responsible for seed and seeding inventory.
- Maintain a safe work environment for company personnel, contractors, and other stakeholders

Required Qualifications

- B.S. degree in forestry; M.S. degree preferred with emphasis in physiology or genetics.
- Five+ years of experience in nursery operations, forest research, or forest operations.
