

The Lighter Side of Nursery Coop Research

Quick,
We need to get
the worms for fishing
before they die!

Is this what EPA
means by a
“Buffer zone”?

On your mark,
get set,
GO!

HELP!
My foot is stuck
on this blasted
red glue!

Let's see,
the Black Jack
goes on the
Red Queen, Correct?

I hope they don't
lock the gate early!

Remember –
red side goes down!

A photograph of two goldfish swimming in a dark, murky tank. In the upper right, there is a bright blue, porous sponge-like object. A white, curved tube or pipe runs across the top of the frame. The water is dark and contains some suspended particles. The goldfish are orange and are positioned in the lower half of the image. A white, jagged-edged speech bubble is overlaid on the left side of the image, containing text.

I have the
uneasy feeling
that this is
going to be a
long day

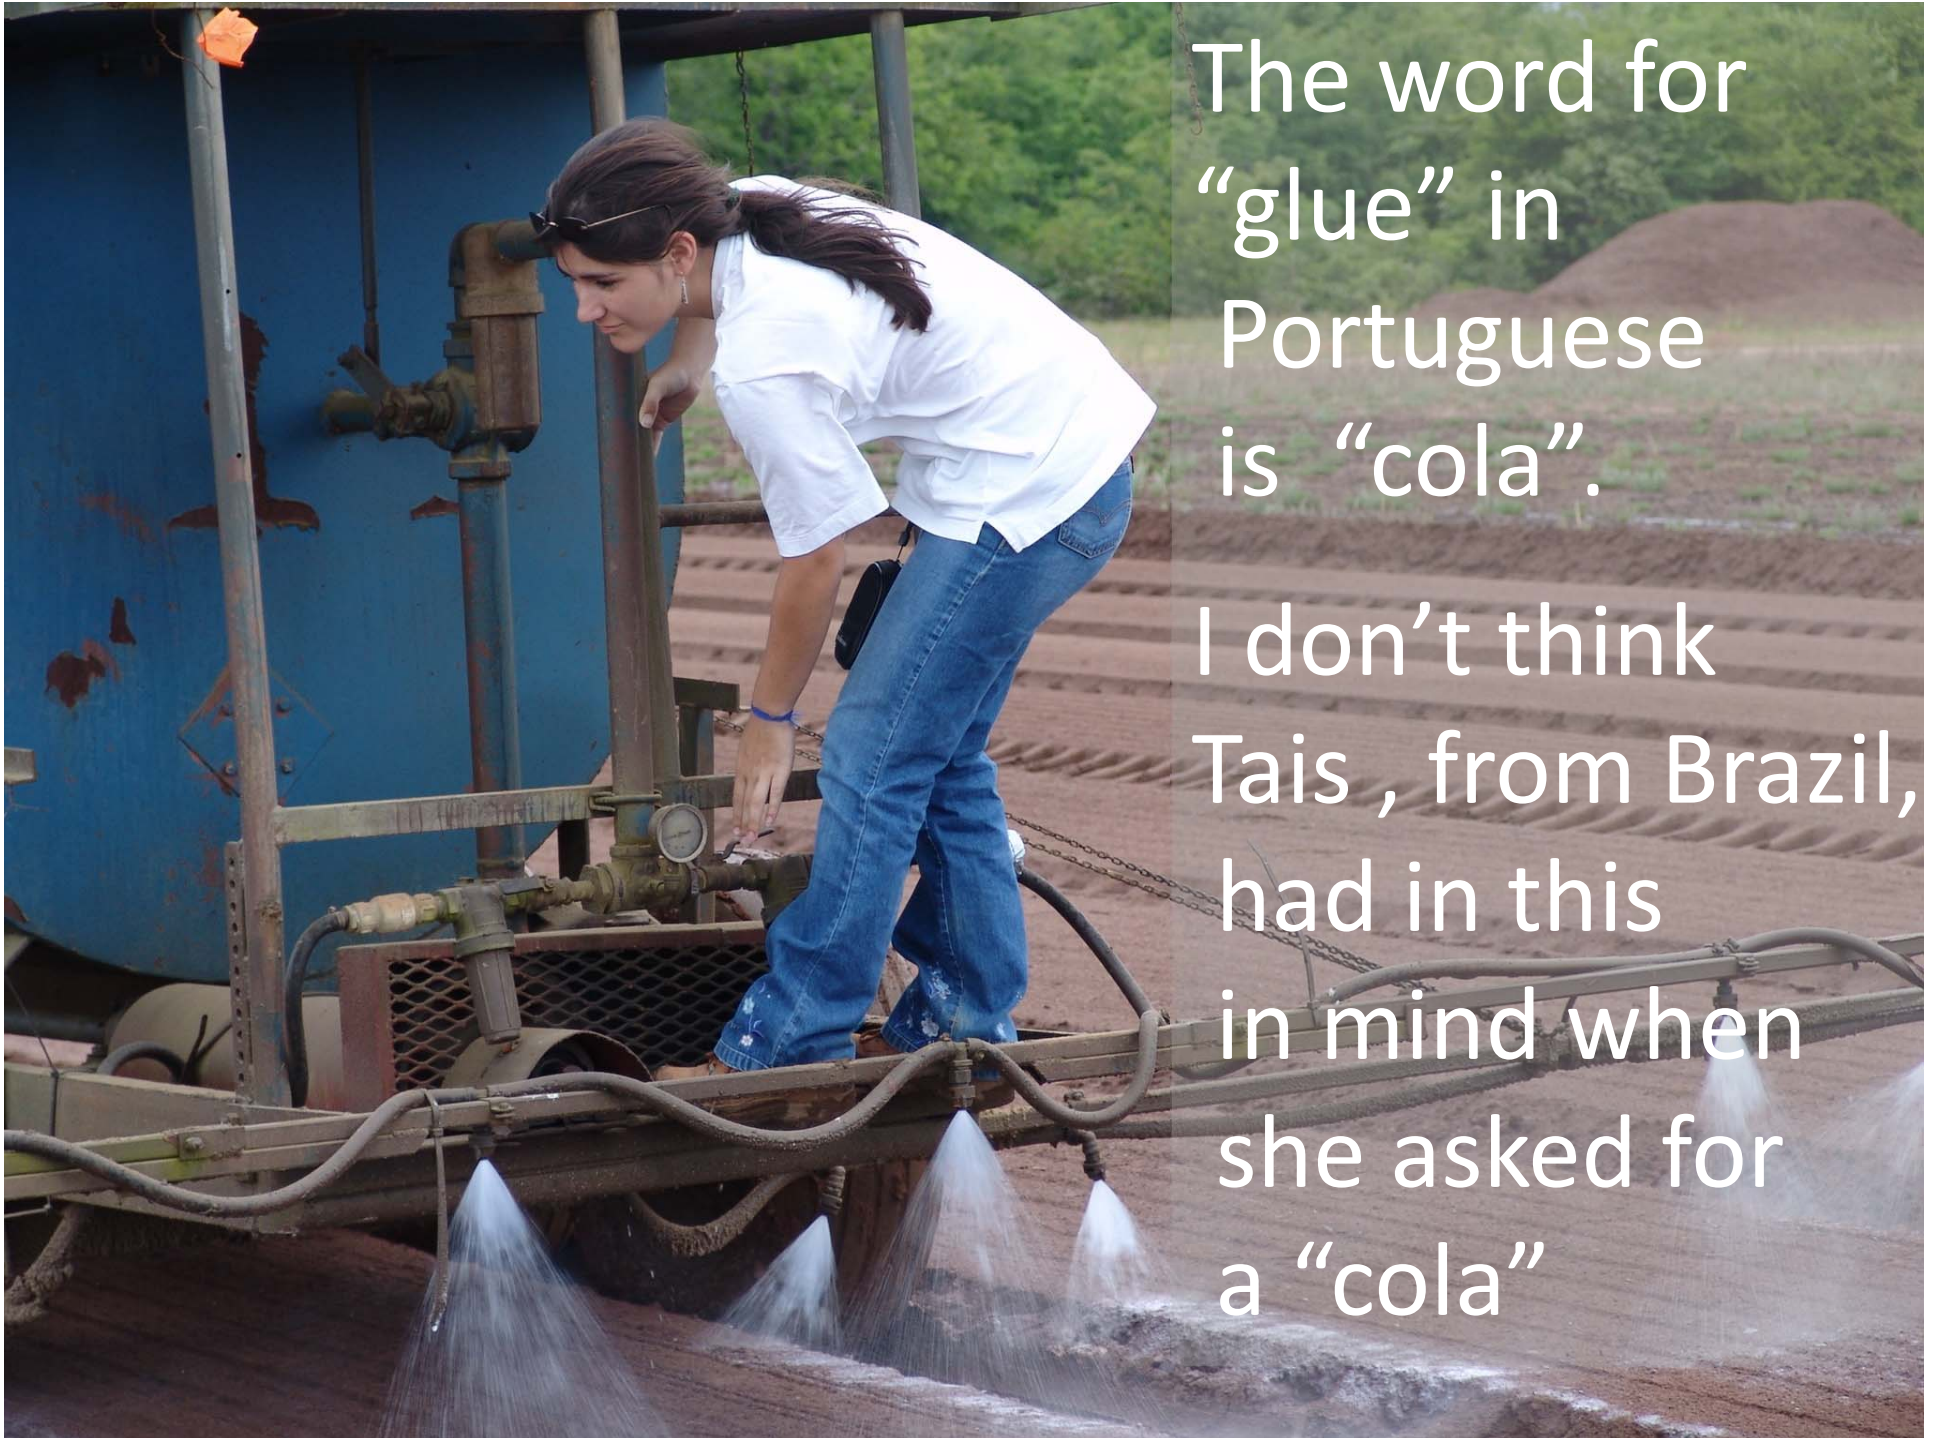

Are you sure
the new EPA RED's
said we were suppose
to check for leaks
like this?

The image shows two people, a man and a woman, kneeling on a large area covered in blue and red plastic sheeting. The man is wearing a blue jacket, white pants, and a white cap. The woman is wearing a black jacket, blue pants, and a green cap. They appear to be inspecting the sheeting. In the background, there is a large barn with a silver silo and some trees. A speech bubble from the woman contains the text: 'Are you sure the new EPA RED's said we were suppose to check for leaks like this?'.

You know
you're a
"Red-neck"
if this is your
idea of a
"Grub
problem"

The word for
“glue” in
Portuguese
is “cola”.

I don't think
Tais , from Brazil,
had in this
in mind when
she asked for
a “cola”

Now, let me get this
straight Ralph,
you have been an
ALABAMA fan all this time?

Some people have
no sense of humor

If I spin
this wheel,
can we
sow faster?

Based on our statistical analysis ($r^2 = .97$),
the next Coop Director will be 4' 6.5" tall

Don't cry Tom,
there will be some
time for fishing later

Nursery Mascot

At least you
don't have
to feed him

At first, David South thought FMC had named a herbicide after him.

Then he realized they want people to ignore him!!!!

When the days work is done,
some nurseries have
beautiful ponds
for fishing....

At other nurseries,
we are forced
to improvise...

But, overall,
we have
enjoyed ourselves

😊 THANK YOU 😊!

This is work??
5.5 lbs!!

A comprehensive pre-written set of ISO17799 compliant and cross-linked security policies. Finding good source material for this is not always straightforward... hopefully the ISO17799 Newsletter can help. Although there is a myriad of sites on this topic, we have produced one which explains the theory and base methodology for most major approaches. One recommendation worth contemplating with respect to risk: establish the relationship between risk analysis and compliance with security policy (and indeed the

This past year the Coop traveled enough miles to go around the earth **1.3 times** putting in studies and collecting data.

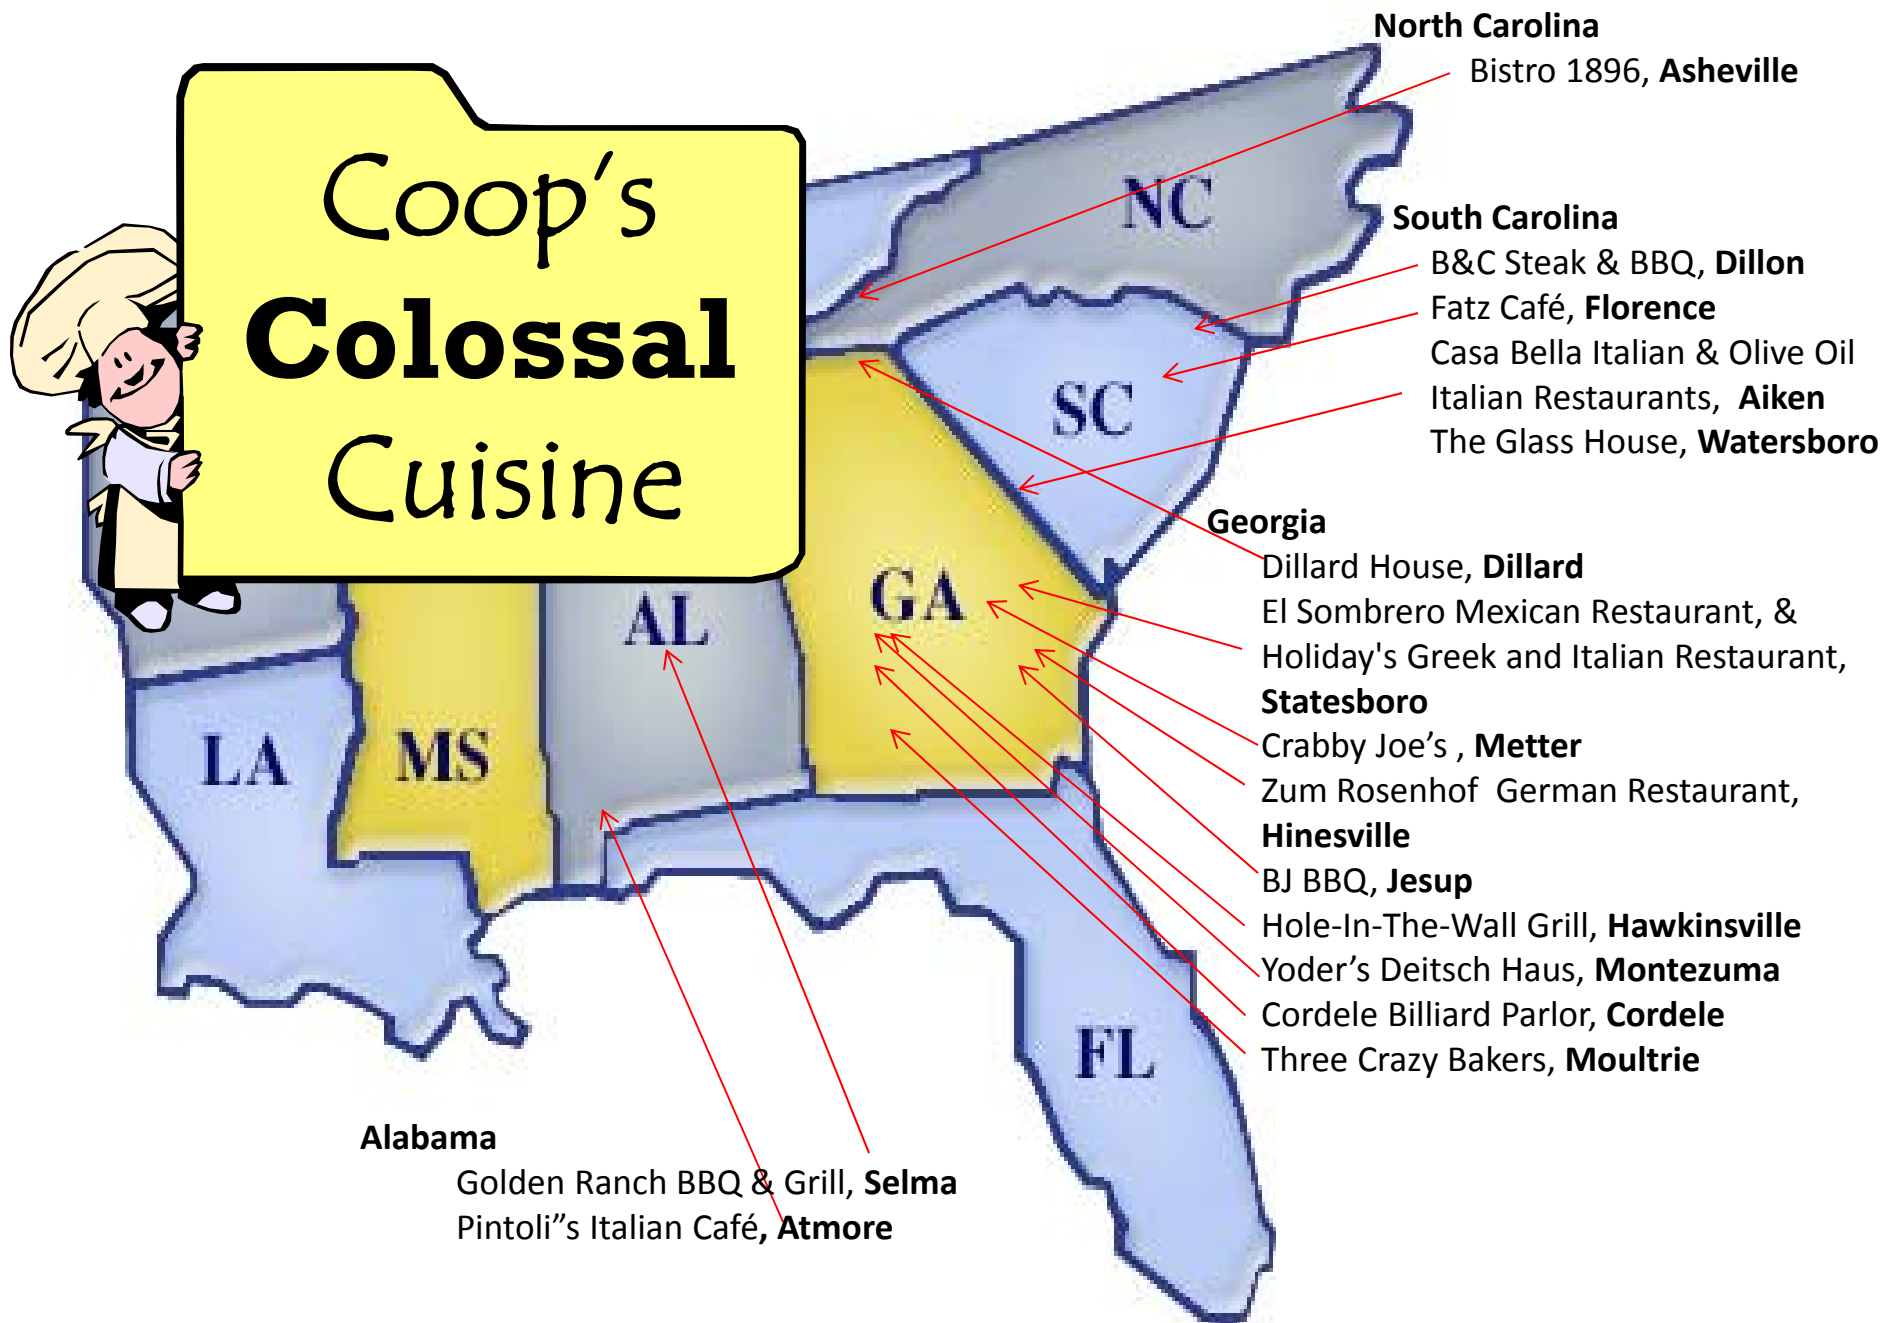

In an effort to reduce the cost of travel we are going “green” next year!
